

TOWA APN SERIES

The APN label applicator is an epoch-marking tool to simply and firmly dispense and apply self-adhesive labels in rolls. It can be used to apply barcode labels, product labels, price labels, packaging seals, etc.

- No mechanical adjustment is required and various kind of labels can be dispensed one by one.
- TOWA's new technology sensor senses the label height automatically.
- You can save labelling time and the costs associated to it.

APN Series	Label Width	Weight	Label Height	Label Gap	Maximum Outside Diameter
APN 30	20- 30 mm	316 g	18 – 60 mm	2 – 3 mm	100 mm
APN 60	25 – 60 mm	370 g			
APN 100	55 – 100 mm	416 g			

It is possible to dispense labels with height bigger than 60 mm actuating several times on the lever.

We recommend the use of rolls with 25 mm inside diameter. The rolls with inside diameter of 38/40 mm also can be used.
